

Recommended YouTube Playlists for MLOps

A hand-picked set of free playlists covering ~99% of what you need to learn MLOps

This guide brings together four complementary playlists — from a hands-on project-based course, to a widely-followed practitioner channel, an official cloud-platform series, and a community of working MLOps engineers. Follow them roughly in order for a structured path from fundamentals to production-grade deployment.

1

Vikash Das — The Ultimate MLOps Course

Channel/Owner: **Vikash Das** | 25 videos

■ [Watch on YouTube](#)

Topics covered:

- Data & model versioning with DVC
- Experiment tracking and model registry using MLflow
- Containerization with Docker
- CI/CD automation using GitHub Actions
- Cloud deployment on AWS (ECR & EC2)
- Model serving with FastAPI
- Production monitoring and drift detection
- End-to-end MLOps project implementation

Best for: a project-based, start-to-finish walkthrough of the modern MLOps toolchain.

2

Krish Naik — MLOps Playlist

Channel/Owner: **Krish Naik** | 6+ videos (part of a larger End-to-End ML series)

■ [Watch on YouTube](#)

Topics covered:

- Project structure, logging, and exception handling for ML apps
- End-to-end Deep Learning project (Chicken/Kidney Disease Classification)
- MLflow integration for model evaluation and tracking
- DVC pipelines for reproducible workflows
- Prediction pipelines and simple user-facing apps
- Dockerization of ML projects
- CI/CD deployment to AWS and Azure via GitHub Actions

Best for: learning MLOps concepts embedded inside real, complete ML projects.

3

Google Cloud Tech — MLOps / Vertex AI

Channel/Owner: **Google Cloud Tech (official channel)** | Ongoing series

■ [Visit Channel on YouTube](#)

Topics covered:

- Introduction to MLOps principles on Google Cloud
- Building and understanding ML pipelines with Vertex AI Pipelines
- Vertex AI Feature Store for shared feature management
- Experiment tracking with Vertex AI Experiments
- Continuous evaluation and automatic model updates
- Model monitoring for skew and drift in production
- End-to-end workflow walkthroughs on Google Cloud Platform

Best for: understanding MLOps on a managed, enterprise-grade cloud platform.

Channel/Owner: **MLOps Community** | Talks, podcasts & meetup recordings

■ [Visit Channel on YouTube](#)

Topics covered:

- Real-world MLOps best practices from practicing engineers
- Weekly virtual meetups with industry experts
- Production pipeline challenges and lessons learned
- MLOps vs. DevOps — where they overlap and differ
- Case studies from companies running ML at scale
- Emerging trends: LLMOps, model governance, and monitoring

Best for: staying current with how MLOps is actually practiced in industry.

Note: Playlist contents evolve as creators add new videos. Click each link above to see the current, full video list directly on YouTube.
